ABSTRACT OF DISCLOSURE

--A Web-based consumer service marketing communication network configured to allow members of a consumer service management team and authorized parties to compose and deliver marketing communications to consumers at Websites along on the World Wide Web (WWW). A first Web-based subsystem is configured to allow the service management team members to create and manage a consumer service information link structure for each registered consumer service. A second Web-based subsystem is configured to allow the team members to create and deploy Web-based Multi-Mode Virtual Kiosks (MMVKs) for each consumer service. Each MMVK is implemented by (i) a computer-executable server-side component stored on a first Internet-enabled information server and including code specifying a unique service number assigned to the consumer service, and (ii) a MMVK tag that references the computer-executable server-side component and is embeddable within HTML-encoded pages on the Websites. --
